

Brevo Ecom — 25 Newsletter Placements Under \$4k

August 2026 · Budget ceiling \$3,000–\$4,000 per placement · Optimised for audience relevance over raw reach · Newsletter names are clickable and link to the sponsor or advertise page where one is published

Tier 1 — Ecommerce & DTC operators · highest intent, buy these first

#	Newsletter	Audience	Est. cost	Best buy at ≤ \$4k	Why it fits Brevo Ecom
1	Chase Dimond	100k+ · 46% open · 3x/week	\$2.5–3.5k	Primary + social amplification	Best single fit in the list. An email-marketing newsletter read by ecom founders — readers are actively shopping for an ESP. Omnisend already sponsors it.
2	DTC Newsletter	~160k DTC founders & marketing execs · daily	\$3–4k	Primary, or 2 secondary slots	The default read for DTC operators. Tactical performance-marketing content — retention and email sit natively in it.
3	2PM	~25–60k commerce & media execs · weekly	\$2.5–4k	Primary in a Monday memo	Small list, most senior commerce audience anywhere. High CPM, worth it for credibility with mid-market buyers.
4	Future Commerce	~40k + top-ranked commerce podcast	\$2–4k	Newsletter + host-read podcast bundle	Thought-leadership positioning with retail and DTC leaders. Sells newsletter, research and retail-media packages.
5	Ecommerce Fastlane	~28–50k Shopify merchants · 420+ podcast eps	\$1.5–3.5k	Newsletter + full podcast episode	Shopify-native audience run by an ex-Shopify merchant success manager. Explicitly sells merchant reach to vendors.
6	eCommerceFuel	~15–25k · 7-figure store owners	\$1–2.5k	Primary + community placement	Smallest list here, highest revenue-per-reader. Vetted private community of established merchants.
7	Lean Luxe	~25–35k modern consumer-brand execs	\$1–2.5k	Primary	Premium DTC brand builders. Strong for mid-market positioning rather than volume.
8	Talk Shop Daily	~10–20k · daily · Shopify ecosystem	\$0.5–1.2k	3–4 sends	Cheap, daily, dead-on audience. The right place to test creative and frequency before spending on Tier 1 primaries.
9	Shopifreaks	20k+ · weekly ecom news · incl. platform execs	\$0.4–0.9k	4+ sends	Long-running independent roundup by Paul Dreckler. Cheapest credible ecom slot in the set.

Tier 2 — Email & CRM practitioners · category intent, comparing tools

#	Newsletter	Audience	Est. cost	Best buy at ≤ \$4k	Why it fits Brevo Ecom
10	Really Good Emails	~100k+ email marketers & designers	\$2–4k	Primary	The email-marketing community. Highest category intent of any list here — readers already believe in the category.
11	Jay Schwedelson — Do This, Not That	50k+ email & marketing pros · #1 US marketing podcast	\$1–2.5k	Primary + podcast mention	Practitioner tactics with high engagement and strong personal-endorsement value. Podcast ranks #1 of 55,000 US marketing shows.
12	Email Marketing Heroes	~30k + podcast	\$1–2.5k	Newsletter + podcast	Ecom-leaning email automation audience. Host-read audio converts well against a low newsletter rate.

Tier 3 — Marketing & growth · the buying committee for an ESP

#	Newsletter	Audience	Est. cost	Best buy at ≤ \$4k	Why it fits Brevo Ecom
13	Stacked Marketer	~90–100k performance marketers · daily	\$3.5–4k	Primary, or primary + “Rounding Up The Stack” bullet	~\$100 CPM private rate — tight against the cap, but the audience is buyers. Book 3–4 weeks ahead; last-minute inventory is where discounts live.
14	Demand Curve	100k+ · 50%+ open rate	\$2–3k	Primary	Exceptional open rate. Growth-playbook content that email and automation fits into naturally. Open sponsorship form.
15	Marketing Examined	~200k growth marketers	\$2.5–4k	Secondary slot only	Reach has pushed the primary slot above the cap (\$65–75k/month in sponsorship revenue). Buy the secondary and keep the frequency.
16	Marketing Examples	130k+	\$3–4k	Primary	Copy and conversion case studies. Among the best raw reach-per-dollar at the top of the budget.
17	The Marketing Millennials	~100k+ · large social following	\$3–4k	Primary + LinkedIn amplification	Broad marketer reach with meaningful social spillover from Daniel Murray's own channels.
18	Why We Buy	~70k	\$1.5–3k	Primary	Buyer-psychology angle pairs naturally with lifecycle, retention and automation messaging.
19	Growth in Reverse	~60k · deep-dive format	\$2–3k	Primary	Very high engagement per subscriber, and readers are themselves email and newsletter operators.

Tier 4 — Founders, startups & tech · cheapest reach, top-of-funnel

#	Newsletter	Audience	Est. cost	Best buy at ≤ \$4k	Why it fits Brevo Ecom
20	Starter Story	~100k+ founders	\$2–4k	Primary	Case-study format. Founders launching stores are a credible free-tier pipeline, weaker for mid-market.
21	Indie Hackers	~80k builders	\$0.8–2k	Multiple sends	Historically ~\$750–2k a slot — one of the best reach-per-dollar buys anywhere in this list.
22	Failory	40k+ founders	\$0.8–1.8k	Primary + repeat	Cheap, engaged startup audience with a long sponsorship track record.
23	Trends.vc	~50k operators	\$1–2k	Primary	Research-report format and high trust. Sponsorship inventory is deliberately limited, so book early.
24	TLDR Marketing	Segment of TLDR's 7.2M-reader network	\$2–4k	Secondary/classified on the marketing edition	The flagship is ~\$15k and out of reach. Ask for the segmented edition rate card, not the network one.
25	Sifted	~100k European tech & startup	\$2–4k	Primary	The one buy that indexes on Europe rather than the US — relevant given where Brevo is strongest.

What \$3–4k actually buys — modelled unit economics

Metric	2026 benchmark	Brevo Ecom at \$3,000 on a 50k-open list
Effective CPM (on opens)	\$40–80 B2B · \$80–200 B2B SaaS / marketing	\$60
Sponsored-ad CTR	1–3%	1.5% → ~750 clicks
Effective CPC	—	~\$4.00
Landing-page conversion	15–35% dedicated LP vs 1–3% generic homepage	20% → ~150 signups
Cost per qualified signup	~\$11–21 typical	~\$20

The landing page is the single biggest lever: a purpose-built page converts 15–35% against 1–3% for generic homepage traffic. Sending newsletter clicks to a general product page gives back roughly 10x of the spend.

Negotiation levers at this budget

- **Book 3–4 weeks out, or buy last-minute.** Publishers discount unsold inventory rather than run house ads.
- **Buy 3 issues, not 1.** Single insertions don't build recall. A multi-issue commit typically gets 15–25% off rate card.
- **Ask for the podcast bundle.** Ecommerce Fastlane, Future Commerce, Email Marketing Heroes and The Marketing Millennials all run shows; host-read audio is usually cheap against a newsletter buy and outperforms the display unit.
- **Push for CPA or hybrid.** The market is drifting from CPM to per-signup pricing (~\$11–21 per qualified signup). A lower base plus a per-signup bonus caps your downside.
- **Ask for the segment.** TLDR, Brew and Digiday quote the flagship by default — the vertical edition is a different rate card.
- **Go direct for Tiers 1 and 2.** Marketplaces take ~30% publisher commission, so direct outreach usually gets a better number for the same inventory. Use Paved, Swapstack or beehiv for the long tail.

Instrumentation — non-negotiable per placement

- Dedicated landing page per newsletter, not one shared page.
- Unique UTM and unique promo code, so self-serve signups that never click still attribute.
- Post-signup “how did you hear about us” question, to catch the dark-social halo.
- Measure to **activated** — **store connected**, not signup. Tier 4 will flatter a signup-only metric.

Suggested \$20k first wave

Buy	Spend	Reads out
Chase Dimond — 3 sends	\$8,000	Highest-intent audience, tested at frequency
DTC Newsletter — 1 primary	\$3,500	Scale read on the core DTC operator audience
Ecommerce Fastlane — newsletter + podcast	\$3,000	Shopify-native reach and audio format test
Really Good Emails — 1 primary	\$3,000	Category-intent control against ecom-intent
Indie Hackers + Shopifreaks	\$2,500	Cheap-reach control; expect free-tier skew

Scale into Tier 1 primaries on whatever clears a target cost-per-activated-store. Kill Tier 4 if it only produces free-tier signups that never connect a store.

Explicitly out of budget — don't spend the cycles

Newsletter	Realistic primary rate	Verdict
Morning Brew (flagship)	~\$50,000	Out of reach
TLDR (flagship)	~\$15,000	Buy the segmented edition instead
Lenny's Newsletter	\$15,000+	Out of reach
The Hustle	\$10,000+	Out of reach
Retail Brew / Marketing Brew	\$8,000–25,000	Sub-primary units land near \$4–8k — you'd be buying scraps
Modern Retail (Digiday)	\$3,000–6,000	Budget-dependent — worth one exploratory call, not a planned buy

Method and caveat

Prices are **modelled estimates, not quotes**. Each is calculated as (engaged opens ÷ 1,000) × vertical CPM × slot multiplier (primary 1.0x, secondary 0.6x, classified 0.25x), using published 2026 benchmarks: marketing and growth \$25–50 CPM, B2B \$40–80, B2B SaaS median \$112, and \$15–120 across all niches. Audience figures are the publishers' own last-published numbers. Anchor your first email to these figures — then verify every one against the current media kit before committing. Audience sizes and rate cards move quarterly.
